

PAVE DESIGNS

We use gem quality stones in all of our Ironman jewelry whether it is diamond, ruby or sapphire. Stone weights will vary.

Please call for prices.

Big Island Jewelers, Ltd., is the official jeweler of the Ironman Triathlon World Championship since 1996 and is proud to present it's line of Ironman jewelry. Each piece was initially designed with a state-of-the-art computer design technique called stereolithography. All jewelry is individually cast and hand-finished. Any type of custom application is available. Additional gemstones, engraving, textures, variations of design, combination of design into bracelet or necklace design is also available. If you can imagine it, we can design it.

All designs are priced in 14 kt. yellow or white gold, also available in 18 kt. gold (add 35%), and Sterling Silver (subtract 50%). All prices are subject to change due to precious metals market fluctuations.

We specialize in Persian wheat chains, which we feel are the finest American made chains. These chains are guaranteed for life against breakage and come in lengths of 16" to 30", 1 mm up to 3 mm thickness and lobster claw clasps.
